 Valley Soil & Water

The NFPR Watershed extends from upstream of Upper Payette Lake to Banks. Deteriorating water quality impacts *all* of us.

NORTH FORK PAYETTE RIVER

WATERSHED COALITION

OUR WATERSHED. OUR GOALS.

Our Vision

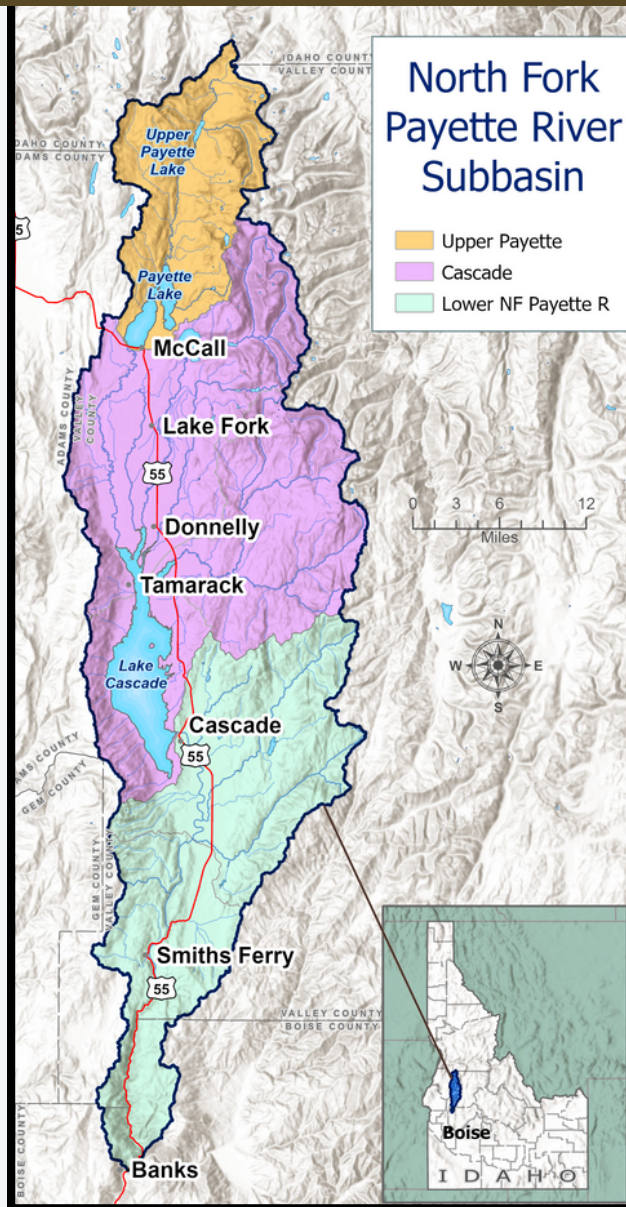

To mobilize a diverse group of North Fork Payette River Watershed stakeholders to identify watershed challenges, cooperatively develop a Watershed Restoration Plan and identify funding sources for plan implementation.

Our Method

The NFPR Watershed Coalition brings community members together to prioritize local watershed issues. Input comes from citizens of all three subbasin areas to represent the entire NFPR Watershed.

Our Purpose

To work cooperatively to protect and enhance our watershed

Meet with the NFPR Coalition:

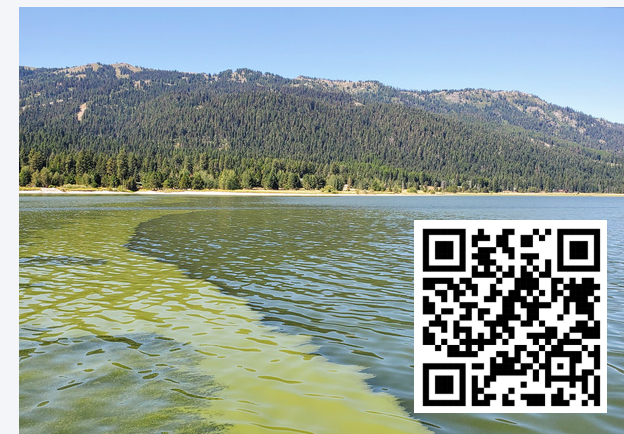

- Learn about the Coalition and the state of our watershed
- Share your watershed concerns
- Explore local action tools and next steps

GET INVOLVED

Join NFPR Watershed Coalition efforts. The Coalition provides a platform for all citizens to identify and prioritize watershed improvement projects with mutually beneficial solutions.

Water quality impacts everyone from recreationists to ranchers. Increasing pressures on water resources can negatively impact drinking water quality, economic potential, natural beauty, and ecological systems that are crucial to Valley County and those who live here.

Scan the QR code below to stay informed on upcoming Coalition meetings, workshops and other opportunities to participate. Have your voice heard.
